

# MATERIALS CHART

Type	Max. Service Temp. °C	Colour	Finish	Use	Special Properties
<b>ACETATE CLOTH</b>					
B-12	105	White	Matt	Wire marker for varnish dip or baking cycles	Oil and heat resistant
<b>ALUMINUM FOIL</b>					
B-184	130	Silver	Matt	Permanent debossed marking	Heat, oil, solvent and abrasion resistant
<b>POLYESTER</b>					
B-11	130	White	Gloss	Roll-form wire marking; hostile environments	Heat, oil and solvent resistant
<b>VINYL</b>					
B-292	66	White	Matt	Machine tool, flat ribbon, and wire marking solvent resistant	Conformable, durable; oil, water and mild
B-702	105	White	Gloss	Vinyl coated; machine tool labelling	Oil and mild solvent resistant; high adhesion
B-708	66	White	Gloss	Indoor/outdoor cable marking solvent resistant; self laminating	Conformable, durable; oil, water and mild
<b>VINYL CLOTH</b>					
B-500	82	White/Yellow	Matt	All-purpose marker	Moderate heat, oil and dirt resistance; high adhesion

**WM - 25**

## PART NUMBER EXPLANATION

Most BRADY references for wire marker cards and books follow the same two-part format: The first code indicates the BRADY product being referenced, the second code indicates the marker legend. You can use either the part number or reference number to place your order.
