

LABELMARK™ V3 LABELLING SOFTWARE: EASY, EFFICIENT & COST-EFFECTIVE LABELS

LabelMark™ V3 has been developed specifically for identification applications in the telecom, electrical, laboratory and general industrial markets. LabelMark™ V3 is the logical solution for label design, editing and printing to your specific requirements.

New Labelmark™ V3 Features

- **A date/time feature** for easy insertion of date and/or time fields into the labels.
- **Improved and simplified serialisation feature** with a wizard that guides users through advanced serialisation.
- **Simplified** data importing for spreadsheets and ASCII text files. A wizard guides the user through the data import functions.
- New label formatting and editing features for **easier label creation**.
- **Easy creation and editing** of label templates.
- **Redesigned toolbars and menus** for easy access to all program features.
- **Find and Replace** feature for easy search and replacement of text in label files.
- **Pre-installed** common industrial symbols and label part templates.

Standard Features:

- **Two great programs** in one package. LabelMark for simple text only labels, and LabelMark Plus for versatile free-form label design.
- Multi-label view for true **What You See Is What You Get** representation of label formats.
- **Text Features:** simple text entry, formatting and editing, Find & Replace feature.
- **Versatile serialisation** creation from simple to advanced.
- **Automatic legend repeat** for quick wiremarker label creation.
- **Date/Time feature** for easy insertion of date and/or time fields into labels.
- **Data Import Wizard** greatly simplifies importing data from spreadsheets and ASCII text files. You can also use existing ODBC and OLE DB data sources
- Accommodates **all Brady stock** and custom formats.
- Easy creation and editing of label **templates**.
- Includes an **image library** of common electrical, datacom and safety symbols.

LabelMark™

LABELLING SOFTWARE

Part Number	Reference	Version
60721	LM3	LabelMark Version 3 - Single User Licence
