

HEATEX™ CABLE MAKERS – B-7643

The Heatex™ cable markers are made of a Thermoplastic Polyether-Polyurethane (PUR), zero halogen material, suitable for both thermal and dot matrix printing. The markers are supplied on a thermal transfer printer liner which allows you to print mounting instructions on the liner. The markers can be printed with any THT printer. The markers can be removed one by one off the liner, which allows you to print big batches and use each marker at the time when you need it.
